Bow Length : 50"  
Draw weight  
: 35, 40, 45, 50, 55, 60 lbs

# Great Plains Traditional Bow

## U-Bar System

The new u-bar hardware for traditional bow risers is the most effective way we have found to incorporate a take down system in a long bow style riser. Roll back the rubber grip, then with the palm of your hand bump the bow apart. It is easy and quick. The system is simple yet it works perfectly. It allows you to keep your traditional style complete. We are using the u-bar in our Great Plains longbow and our 60-inch long curve. All of our wood combinations are available in these bows. Phenolic and diamond wood are used in the risers for strength. This is necessary for the u-bar system.

## B-model Take Down Recurve

This beautifully crafted riser comes in all of our exotic and domestic woods. The riser has an arched beam in the handle and an arched grip section along with the Great Plains inlaid antique brass logo.

The B-model is built with the same shooting design as the original take down recurves. These bows come in 58", 60", 62", and 64" lengths.

*Left to right:*

**Wolf Creek** -- zebra wood and padauk riser with zebra wood limbs

**Rio Bravo** -- zebra wood and shedua riser with bacote limbs

**Estacado** -- birdseye maple and coco bolo riser with birdseye maple limbs

**Cazador** -- bubinga riser with yew wood limbs

**Bamboo** -- Honduras rosewood and birdseye maple riser with Tonkin cane bamboo limbs.

**Palo Duro** -- coco holo riser with imbua limbs

**Red River Gray** -- (not pictured) gray action wood

## Original Take Down Recurve

The original take down recurve we have been building for many years is still great looking and hard hitting. These bows come in 58", 60", 62", 64", and 66" lengths.

*Left to Right:*

**Cazador** -- bubinga riser with yew wood limbs

**Wolf Creek** -- zebra wood riser with zebra wood limbs

**Red River Gray** -- gray dyed laminated maple (action wood)  
Also available in brown action wood

**Rio Bravo** -- zebra wood and shedua riser with bacote limbs

**Limbs** -- bacote and Tonkin cane bamboo

## B-model 60" One Piece Recurve

The new B-model is the same design as our original one piece recurve with a new arched design in the riser.

*Left To Right:*

**Red River Gray** -- gray action wood riser with black phenolic arch and gray action wood limbs

**Rio Bravo Gray** -- zebra wood and shedua riser with bacote limbs

**Palo Duro** -- zebra wood riser with zebra wood limbs

**Cazador** -- Honduras rosewood and coco bolo riser with yew wood or bamboo limbs

**Limb** – Bamboo

**Cazador with bamboo**

**Red River Gray**

**Rio Bravo**

## Original 60" One Piece Recurve

An excellent bow for draws from 24 to 30 inches. A very smooth drawing bow. The set forward handle design is like an extension of your arm allowing a natural instinctive pointing of your bow for superior accuracy. This graceful custom recurve has proven to be exceptional in performance. Tremendously hard hitting and very smooth.

*From Left To Right:*

**Kiowa** -- A more economical bow yet still great looking. Shedua riser with brown bow tuff glass over maple

**Red River Gray** -- gray action wood riser with gray action wood limbs (also available in brown action wood)

**Wolf Creek** -- zebra wood riser with zebra wood limbs

**Palo Duro** -- coco bolo riser with imbua limbs

**Cazador** -- Honduras rosewood riser with yew wood or Tonkin cane bamboo limbs

**Rio Bravo** --

## Take Down Long Bows and Texas Long Curve

This take down longbow is exceptional in every way. Engineered for smoothness and speed this bow has proven to be a tremendous performer.

Compact--breaks down into a very small package.

Sleekness--a beautifully designed riser with inset limbs, brass limb sleeve washer combination for bolt with double alignment pins.

Bow lengths are 60", 62", 64", 66", and 68"

*Left to right:*

**Osagian** -- coco bolo riser with osage limbs and horn tip overlays

**Bamboo** -- shedua riser with Tonkin cane bamboo limbs and horn tip overlays

**Cazador** -- bubinga riser with yew wood limbs

**Plainsman** -- tulip wood riser with tulip wood limbs and osage limb cores

**Rio Bravo** -- bacote or zebra wood riser with bacote limbs and osage limb cores

**Texas Long Curve** -- 58" recurve limbs. Very quick and stable. Same riser and wood as the take down long bow.

## Traditional style long bows

Our long bow is one of the best long bows you will ever shoot with its excellent reflex-deflex design and trapezoid limbs. Very smooth with superior speed and no hand shock make this the long bow of choice. All long bows have hand sewn leather or buck skin grips and are available in lengths of 60", 62", 64", and 68".

Left to right :

**Great Plainsman** -- coco bolo riser with cedar and red elm core limbs

**Great Plainsman** -- zebra wood riser with red elm limbs

**Great Plainsman** -- shedua riser with Tonkin cane bamboo limbs, horn limb tips and seal skin window plate

**Rio Bravo** -- bacote and zebra wood riser with bacote limbs and osage limb cores

**Osagian** -- coco bolo riser with osage limbs, horn limb tips, and seal skin window plate

**Plainsman** -- bubinga riser with yew wood limbs, horn tips, and seal skin window plate

Left to right:

**Osagian** -- coco bolo riser with osage limbs, horn limb tips, and seal skin window plate

**Great Plainsman** -- zebra wood riser with red elm limbs

**Great Plainsman** -- shedua riser with Tonkin cane bamboo limbs, horn limb tips and seal skin window plate

**Rio Bravo** -- bacote and zebra wood riser with bacote limbs and osage limb cores

**Great Plainsman** -- coco bolo riser with cedar and red elm core limbs

**Plainsman** -- bubinga riser with yew wood limbs, horn tips, and seal skin window plate

## One Piece Long Curve

This sleek stylish bow delivers a big punch. The new 60" long curve matches up with our Texas long curve. From the hand sewn leather or buck skin grip to the sleek fast design you will love this bow. Available in all woods.
